

Team Contribution Report

Project Title: Chat Module and Events System

Team lead: Alexandra

Technical lead: Paul

Members: Andrada | Cezar | David | Darius | Denisa | Felician | Maya | Nicoleta | Raul | Robert | Teodora

Assignment Requirements:

1. Create New Project (CNP)
2. MVC GUI – Controller that calls the .API.Server controller + ModelView + View (GUI)
3. Authorization (A)
4. Debugging (DBG)
5. Sequence Diagram (SD)

Task Distribution per Member:

Team Member	Requirement	Task(s)
Alexandra	CNP	Created the ChatAndEvents.Web project and setup.
	A	Protected the app from unauthorized users using cookies and authorization for all controllers.
	SD	Sequence diagram for posting a new memory to an event.
	DBG	Added some missing buttons and connected them to their controllers
Andrada	GUI	For AttendedEventView and MyEventsPage
	SD	Sequence diagram for ArchiveEvent
Cezar	GUI	For MessageSearchPanel and MemberPanelView (it also has the Member Display Item vmmodel)
	SD	Sequence diagram for send message
David	GUI	For Submi proof dialog and Discussion Control (it also has DiscussionMessageItem vmmodel and the Discussion vmmodel)
	SD	Sequence diagram for creating an event
Darius	GUI	For Quest (QuestApprovalPage; QuestAdminControl; QuestUserPage – it also has the QuestItem vmmodel and QuestUser vmmodel) and Create Event Control (it also has create event page, create event setp1, create events step 2, create events step 3)
	SD	Sequence diagram for<not done yet>.....
Denisa	GUI	For RegisterWindow and CreateGroupDialog
	SD	Sequence diagram for react to an announcement
Felician	GUI	For ReputationPage and AnnouncementController (it also has announcement item vmmodel and announcement vmmodel)
	SD	Sequence diagram for pin an announcement
Maya	GUI	For MemoryView and NotificationView
	SD	Sequence diagram for delete notification

Nicoleta	GUI	For ForgotPasswordWindow and LoginWindow
	SD	Sequence diagram for logging in with valid vs invalid credetials
Paul	DBG	Debugging of the app and making sure everything works as it is supposed to
	SD	Sequence diagram for<not done yet>.....
Raul	GUI	For ChatView, Conversation, ConversationSidePanelView, and ConversationListView
	SD	Sequence diagram for ToggleFavouriteConversation
Robert	GUI	For MainWindow for Chat (it also has base vmodel and main vmodel) and Event (EventStatisticsPage, EventDetailPage, and EventListingPage)
	SD	Sequence diagram for join event
Teodora	GUI	ProfileView, Friend Requests View, and FriendListView (it also has FriendListItem vmodel)
	SD	Sequence diagram for AcceptFriendRequest

Task Distribution proves: WhatsApp Messages + Trello board

So, legat de urmatorul assignment, noi trebuie sa facem partea de frontend pentru web app. Trebuie creat un nou proiect :
ASP.NET Core MVC Web App GUI
Numit ChatAndEvents.Web probabil ori whatever

Proiectul va fi conectat printr-un dependency de
ChatAndEvents.API.Server

Se vor folosi serviciile si controllerele de la acel proiect.

In acest proiect cream viewmodels and models. Aceeasi chestie , sa nu fie logica in views !

Ma gandesc ca fiecare sa isi aleaga cate doua view-uri din proiectul initial ,si sa il refaca , logica ar trebui sa ramana neschimbata (the viewmodel) si .cs-ul mostly, dar view-ul in sine se modifica , folosit-va de chat sa vedeti cum trebe facut. Se foloseste MVC ca pattern.

Dupa aceea fiecare trebuie sa isi aleaga o functionalitate... [Read more](#)

11:31

Cand va alegeti , scrieti in descrierea grupului ce ati ales
Nume : view1, view2
Sau
Nume : creare+autentificare

11:33

Ca termen ar fi miercuri seara, sau joi de dimineata, ca sa avem timp sa rezolvam orice posibile probleme

12:10

So , fiecare isi alege cate 2 view-uri din proiect, le refaca pentru Web application, asta include view + viewmodelul ce tine de el + controllerul din proiect care face callul catre HttpService classuri din ChatModule .

toate astea trebuie adaugate in proiectul ChatAndEvents.Web

dupa ce ati adaugat un view / controller legati-l cu DI in Program.cs am adaugat un exemplu

ca startup am configurat sa fie ambele proiecte, SI .Web si .API.Server pentru ca avem nevoie de amandoua, iar porturile le puteti gasi in Properties pentru fiecare ori daca nu in Program.cs in .Web

o sa fac si tabla pe trello unde o sa fie o lista mare cu fiecare task si dupa liste cu numele fiecaruia, va alegeti si trageți cardurile cu taskurile in lista voastra cand le alegeti.

19:39

<https://trello.com/b/z2vaiwi4>

20:26

cine nu poate sa adauge / schimbe chestii in trello sa imi scrie in privat sau aici ce isi alege

20:27

Deadline maine seara / joi cel tarziu pana in ora 10

20:27
